BOPPIDI ANISH REDDY

B.Tech Computer Science & Engineering | IRM Level 1 Certified

+91-9392148106 | anishreddyboppidi@gmail.com | linkedin.com/in/anishreddy-boppidi | github.com/Anishreddy-gith

Hyderabad, Telangana, India | Open to relocation

PROFESSIONAL SUMMARY

Pre-Final year B.Tech Computer Science student at Mahindra University with a strong focus on AI security research and Governance, Risk & Compliance (GRC). IRM Level 1 Enterprise Risk Management certified. Hands-on experience building AI-powered cybersecurity systems — including insider threat detection (GNN+LSTM), autonomous malware reverse engineering, and zero-day vulnerability discovery. IEEE Student Branch Chair and Quantum Computing Club President. Actively seeking roles and internships in Cybersecurity, AI Security, and GRC at MNCs.

EDUCATION

Mahindra University, Hyderabad Aug 2023 – Jun 2026

Degree: B.Tech – Computer Science & Engineering

CGPA: 6.25 / 10 (till 5th semester)

Coursework: Deep Neural Networks, Information Security & Risk Assurance, Computer Networks, AI/ML, Software Engineering, Enterprise Risk Management, Optimization Techniques

Institute of Risk Management (IRM), United Kingdom 2025

Qualification: IRM Level 1 – Enterprise Risk Management

Result: Pass | Evaluated by AICTE

Narayana Junior College, Hyderabad 2021 – 2023

Qualification: Class XII – TSBIE

Percentage: 84.2%

TECHNICAL SKILLS

AI / ML & Security: LLMs, RAG Pipelines, Multi-Agent AI, GNN, LSTM, Transformer (CodeBERT), Federated Learning, Anomaly Detection, Adversarial ML, Fuzzing (AFL++), Symbolic Execution (angr), Predictive Maintenance

Cybersecurity & GRC: MITRE ATT&CK Framework, NIST NVD, CVSS Scoring, ITGC & ITAC Controls, Threat Intelligence Reporting, Malware Analysis, Vulnerability Assessment, SIEM (fundamentals), Wireshark (basic), ISO 31000, COSO, Third-Party Risk Assessment

Frameworks & Tools: PyTorch, PyTorch Geometric, Hugging Face, LangChain, FAISS, FastAPI, Kafka, Docker (basic), REST APIs, BioBERT, RDFLib

Languages: Python, C, JavaScript (React, Node.js, Express.js), SQL, MATLAB, HTML/CSS

Platforms & DevOps: GitHub, AWS (fundamentals), Azure (concepts), MongoDB, Microsoft Power BI

WORK EXPERIENCE

Software Developer Intern | The Art of Living International Centre, Bengaluru Jul – Aug 2025 | On-site

- Developed automation solutions for core company services, streamlining regular operational workflows and reducing manual effort across teams.
- Designed and built an Employee Lifecycle Management System to manage onboarding, updates, and employee records efficiently.
- Built a web platform to collect and manage employee data from across India, ensuring structured storage, easy updates, and scalability using database systems.
- Collaborated cross-functionally with different teams to align technical solutions with business requirements and ensure smooth deployment and adoption.

RESEARCH & PROJECTS

AI-Powered Insider Threat Detection System | *PyTorch Geometric, Kafka, FastAPI* Jan 2026 – Present

- Engineered a GNN + LSTM ensemble for behavioural anomaly detection in enterprise environments; designed risk scoring framework that reduced estimated false-positive alert load by 40%.
- Built a real-time security monitoring dashboard with FastAPI and Kafka event streaming for threat KPI visualisation and audit trail generation; directly applicable to IT risk dashboards and ITGC environments.
- Integrated federated learning to enable privacy-preserving model training across distributed enterprise nodes without centralising sensitive behavioural data.

Autonomous Malware Reverse Engineering Framework | *GNN, Python, Sandbox* Feb 2026 – Present

- Built an AI-driven reverse engineering framework combining static binary analysis, dynamic sandbox execution, and GNNs for automated malware classification targeting next-generation cyber threat intelligence (CTI).
- Applied cybersecurity risk assessment methodology to evaluate and document threat vectors and control gaps; produced structured threat intelligence reports applicable to IT risk tracking.

AI Zero-Day Vulnerability Discovery Engine | *CodeBERT, AFL++, angr* March 2026 – Present

- Developed a multi-stage vulnerability discovery pipeline combining CodeBERT (static analysis), AFL++ (fuzzing), and angr (symbolic execution) for proactive CVE identification and zero-day threat mitigation.
- Mapped vulnerabilities to NIST NVD and CVSS scoring; generated structured remediation documentation aligned with ITGC and IT Application Controls (ITAC) – directly relevant to regulatory compliance and control testing.

Multi-Agent RAG-Based AI Research Scientist | *Llama, FAISS, LangChain* Jan 2026 – Present

- Architected a 7-agent LLM pipeline using Retrieval-Augmented Generation (RAG) over arXiv to automate research synthesis – reducing manual literature review time by ~70% across 3 test workflows.
- Engineered agent coordination logic for independent knowledge-base querying, source validation, and structured report compilation; deployed with FAISS vector store for sub-second semantic retrieval.
- Implemented agentic execution tracking with structured logging, enabling reproducible, auditable AI research workflows at scale.

ChainGuard – Blockchain AI Supply Chain Risk Monitor | *React, FastAPI, Algorand* 2025 | Hackathon

- Built a full-stack AI supply chain risk monitoring tool during a 24-hour Algorand hackathon; implemented autonomous agent loop with smart contract-based risk alert verification on Algorand Testnet.
- Integrated Pera Wallet for on-chain audit trail, demonstrating third-party risk assessment principles applicable to GRC environments.

NanoDrugOnto – LLM-Augmented Biomedical Ontology | *BioBERT, RDFLib, LangChain* Dec 2025 – Present

- Co-authored a biomedical NLP pipeline integrating BioBERT-based NER, ontology-constrained LLM triple extraction, and RDF knowledge graph construction for nanoparticle-drug interaction modelling.
- Targeting publication at IEEE BHI / ACM BCB; generated all publication figures programmatically using matplotlib and NetworkX.

LEADERSHIP & POSITIONS OF RESPONSIBILITY

Chair, IEEE Student Branch + IEEE CS Chapter | Mahindra University Nov 2025 – Present

- Lead a 200+ member organization at Mahindra University; drive technical initiatives, organize large-scale events, and coordinate with faculty, industry professionals, and global IEEE networks.
- Facilitate connections between students and professionals worldwide, enabling exposure to real-world industry practices and supporting their transition into the professional ecosystem.

President, Qubit MU – Quantum Computing Club | Mahindra University Jul 2025 – Present

- Scaled a specialized quantum computing and AI club; leading workshops, member onboarding, and technical sessions on core quantum concepts.
- Built and nurtured collaborations with industry partners in quantum computing; facilitating student engagement through live projects, knowledge exchange, and mentorship opportunities.
- Act as a bridge between academia and industry by connecting students with professionals for hands-on experience, internships, and collaborative research initiatives in quantum and AI security domains.

CERTIFICATIONS & ACHIEVEMENTS

Certifications

- IRM Level 1 – Enterprise Risk Management | Institute of Risk Management, UK (AICTE Evaluated, 2025)
- Power BI Masterclass | Full Stack Academy (Feb 2025)
- 3-Day Workshop on Data Science & Applications | Mahindra University (May 2025)
- HackerRank Problem Solving (Basic) | May 2024

Awards

- 3rd Place – Cognitive Coup AI Challenge | AEON Tech Fest 2025, Mahindra University | Prize: ₹8,000
- 3rd Place – Quantum Computing Challenge (Qublitz) | AEON Tech Fest 2025 | Prize: ₹2,000
- Presented Social Computing research poster at Mahindra University

RESEARCH & PUBLICATIONS

Published

"The Road to Electrifying India's Public Transport: A Review of Technological, Economic, and Policy Perspectives"

Journal: Indian Journal of Environmental Protection | Co-authored | 2025

- Published peer-reviewed journal article reviewing EV adoption barriers, policy frameworks, and economic feasibility of electrifying India's public transport infrastructure.

Manuscripts Under Preparation

NanoDrugOnto – LLM-Augmented Biomedical Ontology Dec 2025 – Present

- Biomedical NLP pipeline integrating BioBERT-based NER, ontology-constrained triple extraction, and RDF knowledge graph construction for nanoparticle-drug interaction modelling.

AI-Powered Insider Threat Detection via GNN+LSTM Ensemble Jan 2026 – Present

- Documents the design and evaluation of ISRA — a behavioural anomaly detection system using federated GNN+LSTM models for enterprise insider threat identification.

Autonomous Malware Reverse Engineering via Hybrid Static-Dynamic GNN Analysis Feb 2026 –Present

- Research on Avanika framework combining static binary analysis, dynamic sandbox execution, and GNNs for automated malware classification and CTI generation.

PERSONAL DETAILS

Date of Birth: 19 May 2006

Languages: English (Professional), Telugu (Native), Hindi (Working), French (Elementary), Japanese (Elementary)

Location: Hyderabad, Telangana, India | Open to relocation (Bengaluru, Mumbai and other cities)
